"The Minuteman program accomplished some major milestones during the time of their testing at these facilities."

-Victor E. Jarc, Surprise, Ariz.

#### **ACES WILD**

enjoyed the article "Ace in the hole" about the Minuteman program in your November 2008 edition. However, I noticed you left out a significant contributor to the Minuteman program.

At the time I was employed in the Range Safety Office at Vandenberg Air Force Base, Calif. The Boeing team on site at Vandenberg played a major role in the testing of the Minuteman missile system and subsequent deployment of the program.

I don't recall any other sites that executed silo based launches as extensively as were conducted at Vandenberg. The

support teams were not only on site at Vandenberg but throughout the Western Test Range. This system, along with the Titan, Atlas, and Thor Delta, were major programs being developed and tested at that time.

The Minuteman program accomplished some major milestones during the time of their testing at these facilities. Perhaps in the future you could do an article on this phase of both the Minuteman and Delta programs led by Boeing and McDonnell Douglas respectively.

Keep up the good work with Frontiers!

-Victor E. Jarc Surprise, Ariz.

# CALENDAR /

# 2009 /

# **LETTER GUIDELINES**

Boeing Frontiers provides its letters page for readers to state their opinions. The page is intended to encourage an exchange of ideas and information that stimulates dialogue on issues or events in the company or the aerospace industry. The opinions may not necessarily reflect those of The Boeing Company. Letters must include name, organization and a telephone number for verification purposes. Letters may be edited for grammar, syntax and size.
